The Shipwreck.

"INSCRIBED TO THE 'PACIFIC'."
[Published by Request.]
It was midnight on the waters
And a calm o'erspread the deep;
There were parents, sons and daughters,
Wrapped peacefully in sleep;
There were some unconscious dreaming,
Longing after the dawn;
And in vision fancied gleaming
Gold upon the western shore.
But alas! amid the darkness
There was heard an awful crash,
And each startled, fainting bosom
Heard the angry waters splash;
Ah! then and there were trembling lips,
Bold hearts submissive grew,
While prayers went up in mingled strain,
Entreating warm and true.

The tourist and the mariner
Together wept their common fate;
The rich and the poor, the old and the young,
Looked back upon their years;
They who an hour before had dreamed
Of earthly wealth and love,
Now sought to gain a heritage
Within the far above.

The father and the mother fell
Upon each other's neck,
And kissed the last and farewell
Mid tears that washed the deck;
The hardened sailor bowed before
The terror of the sea;
Each mortal on that fated ship
Fell down upon his knees.
The ship went down beneath the wave—
"Pacific," thou art gone;
And of thy precious, noble crew,
Yea, they who suffered wreck with thee,
Have ceased to stir the world;
The ship of Faith has landed them
In an eternal home.

SOME OF THE FINEST CABINET ORGANS

EVER BROUGHT TO THIS COAST.

NO MORE REEDY, HARSH TONES.

THE WARREN & CLOUGH COMBINATION ORGAN.

New and Wonderful Invention.

The newly invented SCRIBNER PATENT "QUALITY TUBE" (secured by letters patent in the United States, England and Canada). An invention having a 100% IMPROVEMENT on the old organ, in its bearing on the future reputation of Reed Instruments. By means of which the quantity and volume of tone is VERY LARGELY INCREASED, and the quality of tone rendered equal to that of the best Pipe Organs of the same capacity—thus furnishing all the desirable characteristics of the large Church Pipe Organ, in a case the size of an ordinary Cabinet or Parlor Organ, and at a price which is very reasonable.

By means of this invention, an organ containing two sets of reeds operates in volume and power, and VASTLY SUPERIOR IN QUALITY AND BRILLIANCE OF TONE, to an ordinary Reed Organ of six or eight sets of reeds. One of the crowning features of this organ is a peculiar facility with which it adapts the tone of the instrument to ACCOMPANY THE VOICE IN SINGING, the effect upon both singer and listener being charming beyond description. This ingenious invention consists in the construction and application of valves of wood or metal, placed at the rear end, through which the air subsequently passing through the reeds, enters and through which the sound produced by the vibration of the reed escapes. The tubes inclosing the reeds of the reeds are provided with adjustable valves or slides, over the mouth opening, by means of which the tubes may be tuned in unison with reeds, to produce a flute-like tone, such as found heretofore only in pipe organs.

Can be seen and heard on the corner of Sixth and I streets.
